

PHY202 Practice Exam 7 on chapter(s): 27, 28

$$1. \quad \theta = 22.8^\circ \therefore d \sin \theta = m \lambda$$

$$2. \quad E = 1.53 \times 10^{15} \text{ J} \therefore E_0 = m c^2$$

$$3. \quad f = 6.93 \times 10^8 \text{ Hz} \therefore \lambda_{obs} = \lambda_s \sqrt{\frac{1 + \frac{u}{c}}{1 - \frac{u}{c}}}, c = \frac{1}{\sqrt{\mu_0 \epsilon_0}} = \frac{E}{B} = f \lambda$$

$$4. \quad \lambda = 8.22 \times 10^{-7} \text{ m} \therefore d \sin \theta = m \lambda$$

$$5. \quad \Delta t = 3.58 \times 10^{-7} \text{ s} \therefore \gamma = \left(\sqrt{1 - \frac{v^2}{c^2}} \right)^{-1}, \Delta t = \gamma \Delta t_0$$

$$6. \quad \lambda_{obs} = 1.44 \text{ m} \therefore \lambda_{obs} = \lambda_s \sqrt{\frac{1 + \frac{u}{c}}{1 - \frac{u}{c}}}$$

$$7. \quad L = 7.10 \text{ ly} \therefore L = L_0 \gamma^{-1}$$

$$8. \quad \theta = 0.252 \text{ arcseconds} \therefore \theta = 1.22 \frac{\lambda}{D}$$

$$9. \quad \theta = 45.8^\circ \therefore I = I_0 \cos^2 \theta$$

$$10. \quad D = 8.34 \times 10^{-6} \text{ m} \therefore D \sin \theta = m \lambda$$

$$11. \quad x = 3.04 \times 10^3 \text{ m} \therefore \theta = 1.22 \frac{\lambda}{D}, \Delta \theta = \frac{\Delta s}{r}, \Delta s \approx 0.53 \text{ m for small angles}$$

$$12. \quad t = 7.77 \times 10^{-8} \text{ m} \therefore 2t = \left(m + \frac{1}{2} \right) \lambda_n, n_{\text{air}} < n_{\text{oil}} > n_{\text{water}}$$
